

Significantly  
increase your  
production

# THERMODROP

FAST MELTING - INCREASED PRODUCTIVITY - CONSISTENT QUALITY  
EASY HANDLING & LOADING - NO DUST!

## The THERMODROP™ Advantage!

Pelletized Thermoplastic changes everything!

*Transline is an Exclusive Dealer  
of ThermoDrop™*

### The THERMODROP™ Application System

- The introduction of ThermoDrop™ has forever changed the thermoplastic market.
- Increase production with 30-40% faster melt times than powder. ThermoDrop™ offers quicker start-up times and recovers faster when additional bags are added to your premelter.
- Provides up to 10% greater material yields, providing significant savings in material cost.
- A clean and dustless product that operators will appreciate.
- Pellets resist moisture better than traditional powdered thermoplastic.
- Each pellet meets specification, which ensures precise levels of uniformity and consistency.
- Shorter time to reach operational temperature reduces the risk of scorched material, producing a brighter finished product.
- With all the efficiencies gained with ThermoDrop™ through faster melt times, better yields and less hassle, you will get more work done for less!

Pelletized system  
ensures uniform  
color and increased  
quality throughout  
the job.

## The THERMODROP™ Advantage!

Pelletized Thermoplastic changes everything!

**NEW  
PRODUCT**

Above: ThermoDrop™ pellets after only 20 minutes has reached 400° F and more than ready for application. Don't you want your crew to get to work faster?

Below: Powder after 20 minutes not ready. The powder may take an hour to reach application temperatures.

A continuous manufacturing process helps deliver quality marking every time!

Reduced trash means less restrictive thermo passages allowing lower pressure pump operation with faster application speeds.
