

MODEL 360MII

THERMOPLASTIC APPLICATOR

Extrusion dies offer full adjustability and produce razor sharp lines. Other highlights include no die springs, removable tanks for color change, and direct drive bead dispense.

The 360MII continues to be the tool of choice for professional thermoplastic applicators. Trantex dies are available in various line widths from 4" to 24" with double 4" and 6" configurations.

improve performance, enhance safety, and reduce manpower

Features & Benefits

- 360 lb material tank capacity
- All-steel extrusion dies
- Variable width glass bead system
- Automatic ignition
- Hand torch
- Lockable rear caster
- Compact size: 48" x 30" x 39"
- Optional equipment:
 - Thermostat system
 - Quick change second color tank
 - Quick melt system to allow rapid melting of material
 - Line Driver attachment kit for self propulsion
 - Double-drop bead system
 - Full lighting kit with green laser, flood light, and rechargeable battery

Unique lever allowing operator to raise and lower the pointer

All-steel extrusion dies with quick change capability - no tools needed

Optional second color tank or bitumen tank can be swapped in seconds.

Optional double drop bead system
