reduce melt times
double your production

Features & Benefits

- 14" auger system is 40% larger. Ensuring uniform temperatures throughout the material column
- HO burner system delivers over twice the BTU's distributing over a greater area for an even heat transfer
- Streamline proven design chassis
- Removable and interchangeable tank for same machine color change—choose 360 lb or 265 lb tank
- Melt and apply up to 30 bags per day
- Industry exclusive direct drive bead dispense — beads are mechanically and positively engaged so bead reflectance numbers are more easily met

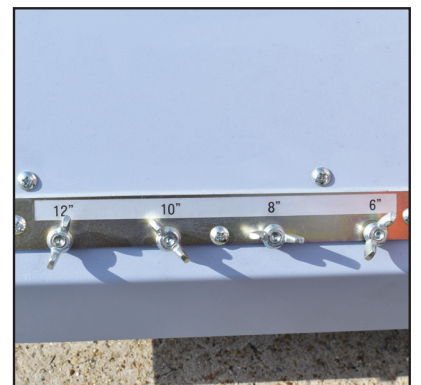

Conveniently located die burner controls

14" auger agitation with bottom blade

Positive direct-drive bead dispense — no frictional wheels

Intuitive bead dispenser quickly adjusts from 4" to 12" and dual 4" widths
