FS TECHNOLOGIES

Highly Effective, Ultra Slim Warning Light

MicroPulse® Ultra models have a low-profile design that offers a broader range of mounting options suitable for external and internal mounting applications. The advanced high-output LED light head can be programmed to operate as a single unit or synchronize with multiple light heads. Built-in flash patterns enable multiple vehicle perimeter lights to be either synchronized in the same pattern or opposite sequence.

MicroPulse Ultra is only 0.4-inches thick

Built to Stand Up to the Most Punishing Conditions

MicroPulse® Ultra lens is made of UV-resistant polycarbonate to protect against harsh conditions. Models include a fully encapsulated water-proof housing, which provides a barrier against moisture and condensation. All MicroPulse Ultra perimeter lights are backed by Federal Signal's five-year warranty.

A Versatile Solution for any Warning Light Application

MicroPulse Ultra is available in single-, dual-, and tri-color combinations of Amber, Blue, Green, Red, and White. Models are standard with a Black bezel or available with a Chrome or White bezel, sold separately.

MicroPulse Ultra lights are available with either a Clear lens or a Smoked lens for an unmarked vehicle. Adhesive mount kits (sold separately) allow for interior window mounting of a MicroPulse Ultra 6 or MicroPulse Ultra 12 light heads in various positions.

FSJoin™ Compatible

MicroPulse Ultra models are FSJoin™ compatible. FSJoin is a programming compatibility feature of Federal Signal's light bars and exterior/interior warning lights that work in conjunction with a Convergence Network siren or controller. When using FSJoin products, the Convergence Network siren/light controller controls all of the vehicle's warning light flash patterns, dimming feature, and light head syncing/altering patterns.

Simplify programming of multiple FSJoin warning lights and light bars with FS Convergence Network Configuration Software.

FSLink™ Compatible

MicroPulse Ultra models feature FSLink, a built-in software technology that incorporates a shared set of flash patterns within Federal Signal's LED perimeter lights, interior lights, mini-light bars, and beacons. This shared flash pattern software allows the various products to be wired together, set in a common pattern and then synchronized together to flash simultaneously or alternately.

Wiring Diagram

WIRE	INTERNAL FLASHER MODE
RED	To +Vdc for Mode 1
WHITE	To +Vdc for Mode 2
BROWN	To +Vdc for Mode 3
GREEN	+Vdc for programming sync/FSLink
BLACK	To Chassis Ground

FSLink products feature (5) programming wires. Wire functions are consistent across all FSLink products allowing for ease of programming.
